

# GHR SST25

INTERNATIONAL SST  
USERS' SYMPOSIUM &  
GHR SST SCIENCE TEAM MEETING

# Advisory Council Recommendations to the GHR SST Science Team

Environment and  
Climate Change Canada  
Environnement et  
Changement climatique Canada

Danish Meteorological Institute

In-person in Montreal (Canada) and online

**JUNE | 10-14<sup>th</sup> | 2024**

# AC Recommendations to ST

- AC would like encourage Science Team members to:
  - Be more active, letting GPO know of GHRSSST relevant activities and publications
  - With the support from GPO, make **GHRSSST activities and data more visible**, including sharing them in open-access
  - Support GPO by providing ideas and materials that contribute to the **'25 years of GHRSSST timeline' web-stories**
- AC recommends to:
  - **Identify Early-Stage Researchers (ESRs) and connect them with the GHRSSST** network to help build capacity in the new generation of International SST users.
  - Work with GPO to **increase ESRs participation in GHRSSST**: Talks, Mentorship program, connect with ST members and TTs
  - Review **TTs formation guidelines on timing**: Voting (and other activities) only during meetings or in between meetings (virtually).
  - Consider having the **SST Users symposium every other year**, still in combination with the ST meeting (which occurs annually). GPO will organise a voting poll in the weeks following the symposium, **please join the discussion and respond to the poll**.
